#### About Adaaran Rannalhi

The **Adaaran Rannalhi** is a 5 hectare island with lush vegetation and a beautiful beach around a house-reef that is home to exotic fish and coral. Between the house-reef and the beach is a lagoon that is ideal for swimming.

In olden times, **Rannalhi** was a favourite fresh-water landfall transit destination for travelling islanders. It was known as 'the measure of gold' (ran means gold, nalhi is a unit of measure) for its beauty and fertility. The beaches are amazing with fine-grained sand. The lagoon is sandy bottomed close to the shore but with good coral growth and exotic fishes at the reef edge, it is excellent for snorkeling.
